Dizanje i spuštanje pera kornjače

Nekada je potrebno pomicati kornjaču bez da ostavlja trag.

- PU (PENUP) – diže pero kornjače
- PD (PENDOWN) – spušta pero kornjače
- PE (PENERASE) – kornjača briše putem kojim prolazi (kad smo završili s brisanjem ponovno spuštamo pero s PX)

10/

Primjer:

- Zadatak 1.
- Pomakni kornjaču naprijed za 100 koraka
FD 100
- Podigni kornjaču i idi naprijed za 50 koraka
PU FD 50
- Spusti kornjaču i idi naprijed za 100 koraka
PD FD 100
